

ALPENBASE TRIP

10 days/ Austria, Northern Italy

Are you ready for jumping the most scenic places in Austria and northern Italy? combine BASEjumping with camping and barbecue? sharing the adventure with other-like minded jumpers?

You know how to BASEjump - we will organize an unforgettable trip in the alps!

Although we focus on terminal jumps, be prepared to do some short delays as well. We have a nice 160m cliff waiting for you, just providing a waterlanding in one of our crystal clear lakes. To reach the exitpoint we have to abseil down and after landing we will pick you up with a boat. Furthermore we will sleep at some mountain huts to shorten the ascent on the next day. The way up often is a nice climb via "ferrata" and the exitpoints provides between 1000- 2000m height difference for an experienced wingsuit pilot.

The minimum requirements for this 10 day adventure are 50 BASE jumps. Basic climbing experience is required to manage the "via ferratas" on the way to the top. The climbs are not really technically but partially very exposed. A good personal fitness is essential. Experience with supporting tracking equipment or wingsuit is essential.

Our service:

The Trip will start in Salzburg/ Austria – we can pick you up at the airport/train-station.

Included is the transportation, breakfast and a hot meal (or barbecue) at night.

We also will provide a trip video, t-shirt and we have pressurized suits for testing, of course.

What to bring:

Outdoor equipment like tent, sleeping mat, sleeping bag, Climbing harness, via ferrata equipment, BASE Equipment, camera,...

If required we can organize all outdoor equipment you need for the trip.

In case of bad weather we will adjust the trip shorthand in the way we get the best chances of a successful jump.

Requirements: min. 50 BASEjumps experience

Maximum people for the Trip: 6

Reservation: 150eur to save your slot

Date: 2.9.-12.9.2010

Price: 990eur (rental of outdoor equipment not included)
