

FJC COURSE

First Jump Course - BASE 4 days/ Austria - Salzburg

Making the decision to take a First BASE Jump Course is probably the best early decision you can make when contemplating adding the adventure of BASE to your life. Instruction from highly experienced and qualified professionals is the best investment you can make.

The course is designed as a beginner's course, for people focused on safely getting into BASE jumping. The FJC will not turn you into a professional BASE jumper in 4 days, but it will give you a safe introduction to BASE jumping and a solid foundation for your future BASE career. Especially in the beginning, injury risk is quite high. It can however be greatly reduced by getting professional training and by acquiring as much knowledge as possible about all aspects of BASE.

Requirements

To participate in the course a minimum of 150 skydives is required. You furthermore need your own BASE specific equipment, which includes a Pin-closed container, a 42"-46" pilot chute as well as a helmet, strong hiking boots and, of course, the right attitude! Base-gear can also be rented for the course - please let us know a few weeks ahead to organize all things in time.

Course

To get started in our four day FJC, you will first of all be forwarded instructions on BASE related canopy flying, thus starting your training before you actually start the course. To prepare properly and get the maximum benefit from the course, you should practise flying your BASE canopy prior to starting the FJC.

The theoretical part of the FJC will familiarize you with BASE specific gear and equipment. We use professional, BASE specific gear only. You will learn how to pack as well as how to configure your BASE gear for specific heights and delays. Furthermore you will learn about materials, object evaluation, weather, and BASE ethics as well as get an introduction to flying track suits and wing suits.

Materials, object evaluation, freefall and optimal body position, dangers, risk management, weather, base ethics, tracksuits and wingsuits are also part of the course.

In the practical part you will learn and practice how to perfectly launch from a fixed object. We first practice from a 17m high exitrainer, where you will train launching while attached to a rope and harness. We developed this method as a secure way to practice a number of safe exits.

The FJC includes pick up from train station or airport Salzburg, all transfers, video analysis as well as video and pictures from your course.

Please contact us about dates.

Once you have joined our FJC, you are eligible for a 20% discount on all pressurized gear.

!!! WARNING !!!

BASEJUMPING IS EXTREMELY DANGEROUS! YOU MAY BE SERIOUSLY INJURED OR KILLED.

PARACHUTES SOMETIMES MALFUNCTION, EVEN WHEN THEY ARE PROPERLY DESIGNED, BUILT, ASSEMBLED, PACKED, MAINTAINED AND USED. THE RESULTS OF SUCH MALFUNCTIONS ARE SOMETIMES SERIOUS INJURY OR DEATH.
