**[My Last Note on Twitter For Business](#) May 28, 2009**

With (curtfrieden & Danny Whitehouse about **Twitter**)

Look at **Alexa.com** it is good for traffic ranking (you can see how twitter was before and his today) so do the same for your site, blogs, etc...

- Use **Twitter Deck**: is easier to use and manage.
- Use **Tr.im**: for making *shorter links* and hiding *affiliate link* and it's good for tracking the traffics (it makes your long URL a short one).
- Use **TweetLater**: is like an auto responder – it will tweet people right back but be cool on it because people could get scare. Set up **Auto Replied**: go to my Twitter account, then its easy to fellow the step automatically.
- Use **Twollo.com**: to help you finding targeted people via conversation subject / interests (like google keyword) – but go slowly as lots of people will tweet right back to you. **You can use it too get more follower on you Twitter**: (auto fellow up) via *keyword* like: work from home, Magnetic Sponsorship, MLM, Network Marketing, Home Business, etc...
- Use **Ping.fm**: to update your social network via tweeter to everywhere i.e.: facebook, Myspace, etc...
- Use **MyTwitterToolbar.com**: it's from the guy from "**The Secrets**" its very good for twitter tips & twitter tools and all for free.
- **Go to <http://twitter.com/curtsecret>** to gets the best tips & video from the guru (create an account on Twitter to just fellow gurus – no friends and family) i.e.: <http://twitter.com/francksecret> **PS**: it's good to schedule time like **15mns to get Gurus** (fellow the list of gurus) then **15mns** replying via your personnel twitter account. It can be time consuming so make it effective.

**Note:**

You need to **create a relationship** and the way to do it is by **following your follower** and its easier with **TwitterDeck** so you can reply directly, interact, etc...

**Note:**

You can **Change your twitter background**, go to setting, and then designed, change background image.

**PS**: You can also add **flash widget** to your blog and Social Network it's useful too.

**Try on Twitter:**

1. by **re-twit** other **twitter** friends (if they good article)
2. Reply to people,
3. Participate,
4. Answer question (if you know the answer)

See: barefoot\_exec she **twitt** people and add other people twitt a lots

**Click Search Technique**, and then enter a search

i.e.: **lphone** a result will be show; press control and scroll on your mouse field (to get all avatar field minimise on the same page) then click control and click avatar that will open all their profile avatar in different tabs, skip the no pictures on avatar as they normally like to stay anonymous so they probably will not come back to you anyway,

**Select the one you like** i.e.: look if they speak English, ratio, go for people who have a lots of following (that show they are pro-active) so they should follow me back, click control + W (to close window) keep doing it,

**Tips new search:** rt = retreat, then click control + W (to close window) keep doing it,

Follow limit is 2000 people so do 900 to start then do it again after few days to a week as people can get busy, you should get about 2 third of people who will come back to you (about 600)

**New search:** click **your Twitter karma** in google click **whack**, then your twitter username and password, it will load up. 5 options go for only following, click all boxes, then click bulk unfollow, you want to clean up your **Twitter Stream** as you can follow only 2000 people so make it worth, its easy and some people will say it's a spam so go to:

[www.socialtoo.com](http://www.socialtoo.com) (Guy Kawasaki love this site)

[Twitter Profile](#) It is good for auto-response and other,

<http://friendorfollow.com> is good to find people then click control + W (to close window) and make sure you follow them or not.

**Let's say:**

Monday your follow 999 people, few days later I unfollow the people who didn't follow me then on Thursday

I do it again, keep doing it twice a week and you should get 1000 people a week on twitter,

**Twitter Follower System** (of [Danny Whitehouse](#))

1. First thing to do is find a user on Twitter who has significantly more follows than you have, into the thousands. For my experiment I chose **John Chow**, a leading 'Make Money Online' blogger, because we share similar interests.
2. Once you have found a Twitter user who fits the criteria, head over to <http://www.flashtweet.com>

Enter your user name and pass to access the program. When you are presented with a navigation list click on 'mass follow'.

When you are on the next screen enter the screen name of the user who we are going to copy their followers, I entered 'johnchow'. Then just click on a page number, start from 1, and press 'follow all' and then hit go. It will take a few seconds to complete but after you have done that, you have added 100 followers just like that. Twitter allows a maximum of 1000 followers a day, so watch you do not go over. I always follow 9 pages each day just to be on the safe side.

3. So you have added almost a thousand followers to your account in just a few minutes. Logic dictates that 40% of users will follow you back within 48 hours due to all the follow back application like **TweetLater** <http://www.tweetlater.com> and so on. Head on over to [TweetPular](#). This is another cool app that is in beta at the moment, but works very well.

4. When you are in [TweetPular](#), enter your Twitter user and pass again, watch the funny bird do the moon walk and then you're in. Click on 'no follow love'. The application will then present you with a list of users who have not followed you back. Check 'unfollow all' and hit go. You may have to do this a few times to get all of them. Once this is done you will have about 40% of the original people who followed you, following you back

You'll also want to monitor how many people you are actually adding each day, you can do this with [Twitter Counter](#).

It shows you a graph of how many followers, following and other your account has been affected by over the last few days.

If you want proof that this system is working, check mine out:

<http://twittercounter.com/Wealthbabes>

**My comments:**

It was great stuff, thanks curtfrieden & [Danny Whitehouse](#),

It is definitely worth it and I will fellow you and see if you fellow me...J

I learn lots but is more to learn as I understand and it's a great Marketing tools too.
